

# MIGHTYFAST BUSINESS MANAGEMENT SYSTEM (BMS)

## Intelligent Software Application for Managing Day-to-Day Hotel Operations

MightyFast BMS is an intelligent software application for managing day-to-day hotel operations. MightyFast BMS's seamless integration with other MightyFast solutions allows it to not only perform traditional property management system functions like automating the processing of guest bookings, details, and payment, but also enhance hotel management through a comprehensive dashboard and room availability overview.

SPEED

ROOM ALLOCATION

CENTRALIZED CONTROL

## FEATURES

- Performs traditional property management system functions like automating tedious back-end operations
- Comprehensive dashboard and room availability overview
- Seamless integration with other MightyFast solutions
