## Highly Affordable One-Stop ACE Solution for Lodging Operators

MightyFast Integrated System is a highly affordable one-stop solution that integrates ACE – Artificial intelligence, Cybersecurity, and Embedded internet of things – to value-add to guest experience, ensure guest safety, and slash operating costs for lodging providers. It enables lodging providers to deliver a seamless guest experience, from the moment a guest starts exploring lodging options, to check-in, guest stay and check-out. MightyFast Integrated System also helps lodging providers manage day-to-day operations and automate tedious back-end processes.

### Artificial Intelligence
Enable guest self check-in and self check-out and gain insights from predictive intelligence with state-of-the-art artificial intelligence.
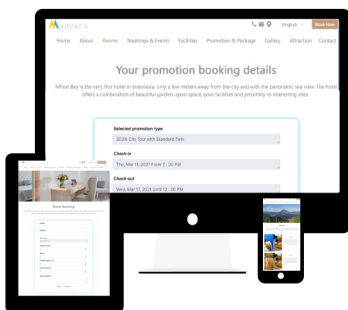

### Cybersecurity
Protect guest privacy and ensure data confidentiality with in-built advanced cybersecurity capabilities.
### Embedded Internet of Things
Enjoy fast, reliable and long-lasting performance at affordable cost with embedded internet of things technology.

### MightyFast Hotel Website Builder
MightyFast Hotel Website Builder is a professional website builder service for hotels to establish a strong web presence. It allows hotels to adopt a distinctive premium look to make their attractions, facilities and offerings stand out. The completed website is user-friendly and straightforward to maintain, even for users with no prior experience. It also allows guests to view room listings and provides integrated support for booking.

## MightyFast Kiosk

MightyFast Kiosk is a compact AI-powered digital concierge that enhances guest experiences through faster, safer and secure self check-in and self check-out. Facial recognition and 100% accuracy optical character recognition technology allows the kiosk to automatically verify guest identities. MightyFast Kiosk's in-built temperature screening function and Touch0 design further safeguard guests, while data encryption capabilities and data diodes help prevent data leakage and protect guest privacy.

## MightyFast E-Lock

MightyFast E-Lock is a keypad access control system that allows guests and staff to avoid the hassle of physical keys or cards. MightyFast E-lock can be easily installed on most doors without having to remove existing lock mechanisms. Additionally, room PINs selected upon guest self check-in using MightyFast Kiosk are automatically synchronized with MightyFast E-lock through Wi-Fi.

## MightyFast Business Management System (BMS)

MightyFast BMS is an intelligent software application for managing day-to-day hotel operations. MightyFast BMS's seamless integration with other MightyFast solutions allows it to not only perform traditional property management system functions like automating the processing of guest bookings, details, and payment, but also enhance hotel management through a comprehensive dashboard and room availability overview.
